SunPower: Silicon Valley Based Global Solar Leader
Creating Thousands of California Jobs
Injecting Billions of Dollars into the California Economy

Through offices, manufacturing, dealer partners, suppliers of equipment, parts and services, construction of schools, government and commercial facilities and power plants, SunPower has a footprint in 42 California counties representing 89% of the population. SunPower's solar systems generated more than 400 GWh of electricity in California in 2010.

1,000+ Direct California Jobs

- Approximately 1,000 employees at offices and manufacturing facilities throughout California
  - 100+ manufacturing jobs at Silicon Valley solar panel manufacturing partner Flextronics in Milpitas
  - 900+ jobs at headquarters in San Jose and in Richmond, California
- Diverse, high quality career opportunities – PhD scientists, engineers, lawyers, accountants, customer care representatives, market analysts, manufacturing and installers, administrative assistants

3,500+ Indirect California Jobs

- 3,000+ indirect jobs in 36 California counties/100 cities from 200+ independent dealer partners
  - Dealers install SunPower's world-leading high-efficiency solar systems and average 15 employees per each small business
- 800+ construction jobs annually through subcontractors on schools and other large-scale systems
- 350 peak construction jobs created from 250MW solar power plant in San Luis Obispo County
- 6 U.S.-based equipment/parts suppliers (manufacturing equipment, feedstock, inverters, plastics) manufacturing and/or headquartered in 3 counties/5 cities throughout California

$1+ Billion Economic Benefit to California

- More than $1 billion in direct and indirect economic benefits to California due to SunPower's job creation impact
- Employees typically return 28% of their salaries back in local, state and federal taxes and spend an estimated 36% on goods and services

Source: 2009 Data, U.S. Department of Labor Bureau of Labor Statistics

$2.5 Billion in California Public Sector Savings Through California Solar Initiative (CSI)

- California's public sector is forecast to save $2.5 billion from solar investments under fully funded CSI program
- Educational institutions alone will save approximately $1.5 of the $2.5 billion total savings
- Public sector solar savings benefit Californian taxpayers, water district ratepayers and mitigate school budget deficits

About SunPower

SunPower Corp. (Nasdaq: SPWRA, SPWRB) designs, manufactures and delivers the highest efficiency, highest reliability solar panels and systems available today, with guaranteed performance.

- #1 manufacturer of installed residential systems in the U.S.
- #1 manufacturer of installed commercial systems in the U.S.
- California and global solar photovoltaic power plants pioneer
- World record 20.1% efficiency solar panel announced June 2011
- World record 22.4% efficiency Maxeon solar cell in commercial production since 2007
- Headquartered in the Silicon Valley for more than a quarter century
